

PRODUCT INFORMATION SHEET

EXOSEX SP*Tab*

Exosex SP*Tab* has been developed for use in a wide range of food processing scenarios. During this development the following points were taken into account:

- There are no detectable residues in food where Exosex SP*Tab* is used.
- No maximum residue limits (MRL's) have been established for any of the components comprising Exosex SP*Tab*. Based on the negligible toxicity shown by these components are have been exempt from the MRL setting process.
- Carnauba and microcrystalline wax used in Exosex SP*Tab* are approved for food use.
- The safety data sheet for Exosex SP*Tab* has been compiled in accordance with the CLP regulations introduced in 2010 and are for use by physicians in the event of misuse of the product
- The Plastic Dispenser Unit (PDU) is coloured blue to make it highly visible and contains a magnetic strip for ease of metal detaction in food processing facilities.
